

# Unlocking new peering opportunities

Louis Richards | Head of Partnerships & Alliances | Console Connect by PCCW Global

TAKE CONTROL | CUT COMPLEXITY | MAKE INTERCONNECTIONS EFFORTLESS

# CONTENTS

In this presentation, you will discover:

Hello & Who we are

Interconnect for IX

How businesses access  
IXaaS

IX partner requirements for IXaaS

Configuring your network

How to get started

# Hello

Console Connect by PCCW Global is the only automated interconnect platform available on the market today that can deliver connectivity on-demand across a Tier 1 global IP network.

Our truly global coverage combined with local on-the-ground knowledge has helped us build best-in-class global connections linking Africa, the Americas, Asia Pacific, Europe and the Middle East.

## About PCCW Global:

Established the PCCW Global brand in 2005

Best in class connections across the globe linking Asia, Europe, the Americas, the Middle East and Africa

Acquired Gateway Communications, Crypteia Networks, Syntelligence and Voxclever, Console Connect's advanced software platform and proprietary technology

**57**  
Offices worldwide

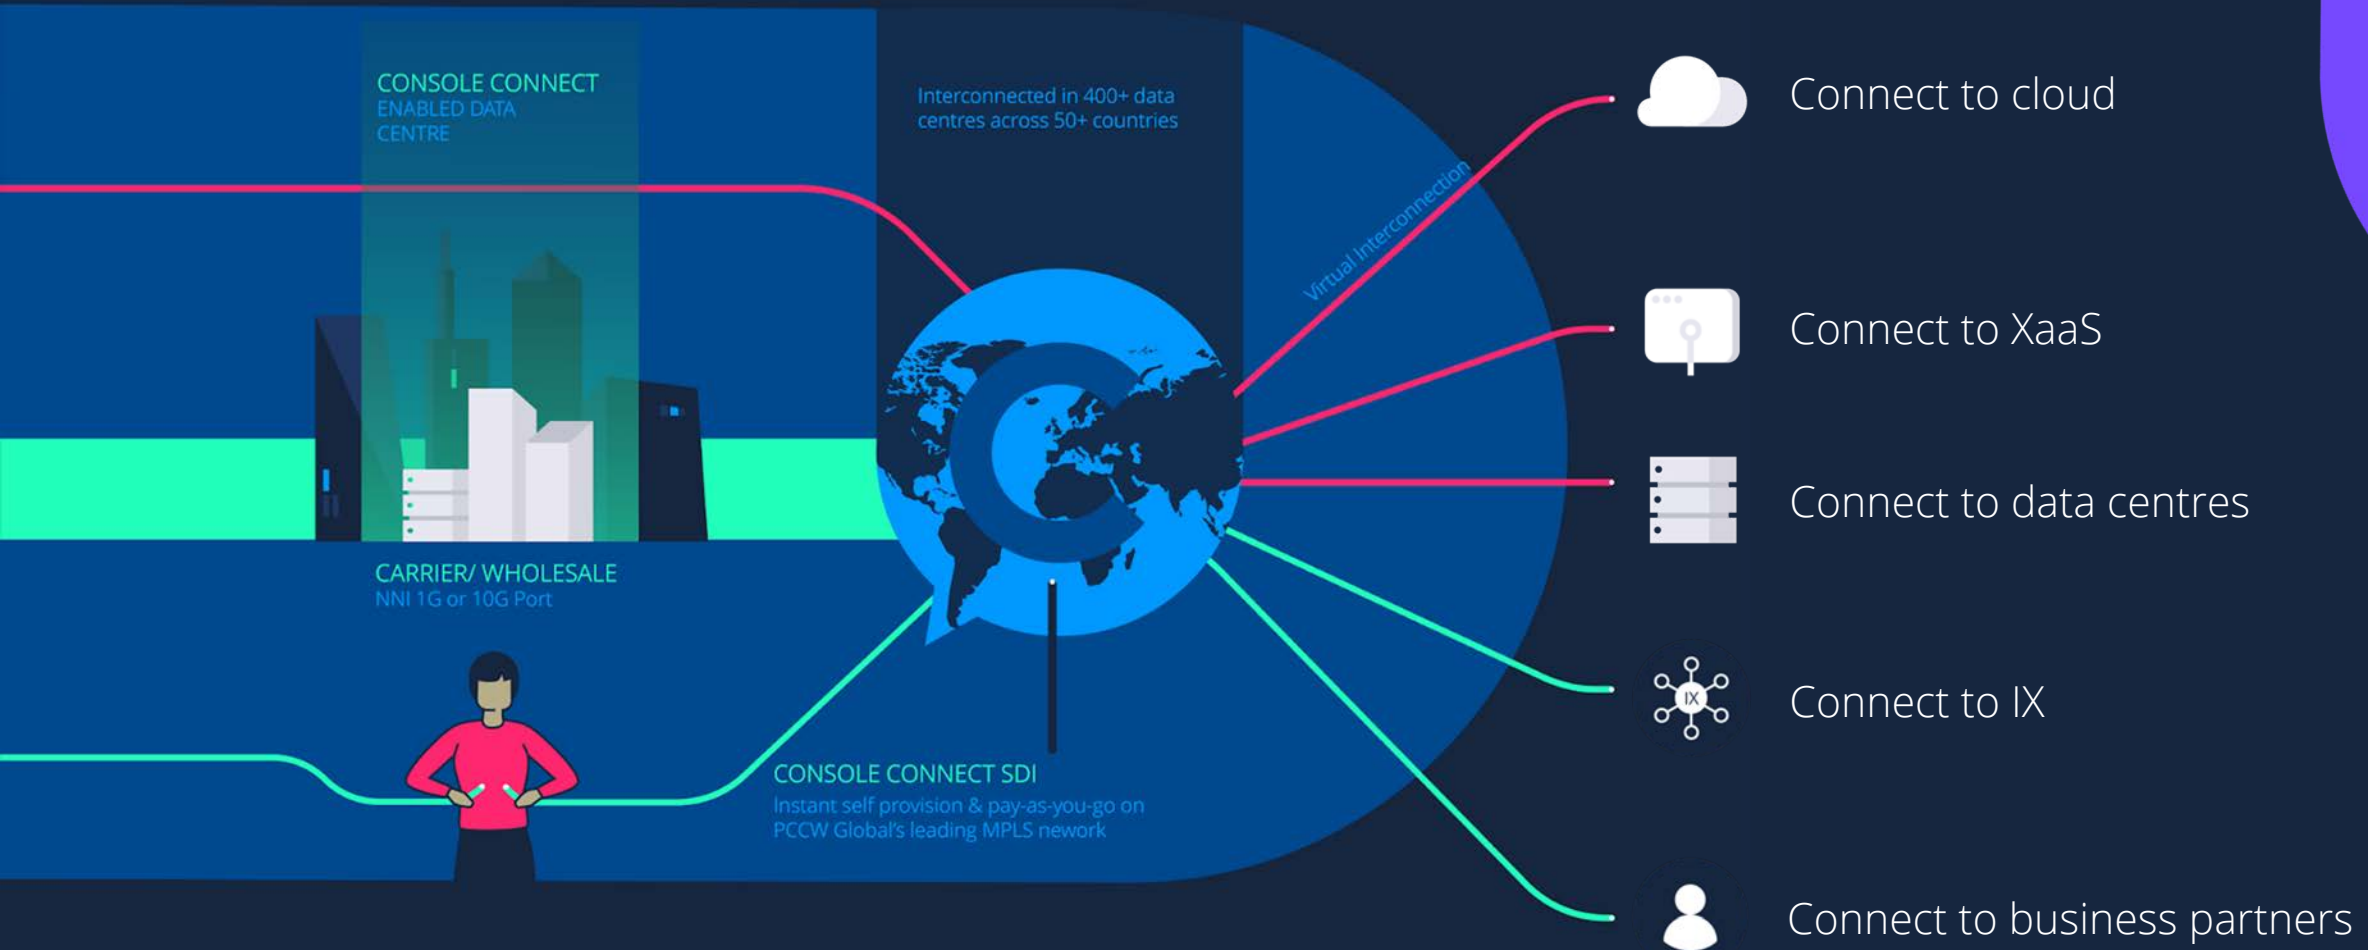

**35**  
Languages spoken

Leading provider of global telecommunications, offering the latest voice and data solutions to multinational enterprises and communication service providers

# Global Interconnection on-demand

- Connect to a global ecosystem of carriers, enterprises, cloud, XaaS, IX, IoT and other NaaS partners.
- Instantly self-provision private and dedicated interconnections between leading data centres worldwide.
- A secure, uncontended Network-as-a-Service (NaaS) platform with global reach.
- Experience fully protected Layer 2 connectivity and uncontended capacity - with stringent SLAs.

# Unlocking new peering opportunities

Carriers, network operators, hosting companies, CDNs and content providers are looking for faster and easier ways to peer at leading Internet Exchanges worldwide.

Remote peering is a popular option among these types of organisations, enabling them to peer without a physical presence at the local exchange point and:

- Reduce cost of infrastructure
- Deploy faster
- Remove the need to contract separately with each IX

Remote peering can be improved by automated Network-as-a-Service (NaaS) platforms, such as Console Connect, that can manage both the peering and end-to-end connectivity.

# Introducing Console Connect for IXaaS

Launched in 2021, Internet Exchange-as-Service (IXaaS) is a faster, more flexible and secure way for businesses to order, provision and pay for IX services from some of the world's largest Internet Exchanges (IXs).

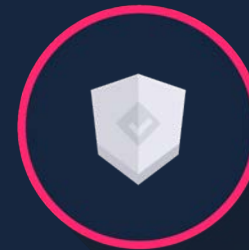

**The remote peering solution brings together:**

**The power of our  
automated Software-  
Defined  
Interconnection®  
technology**

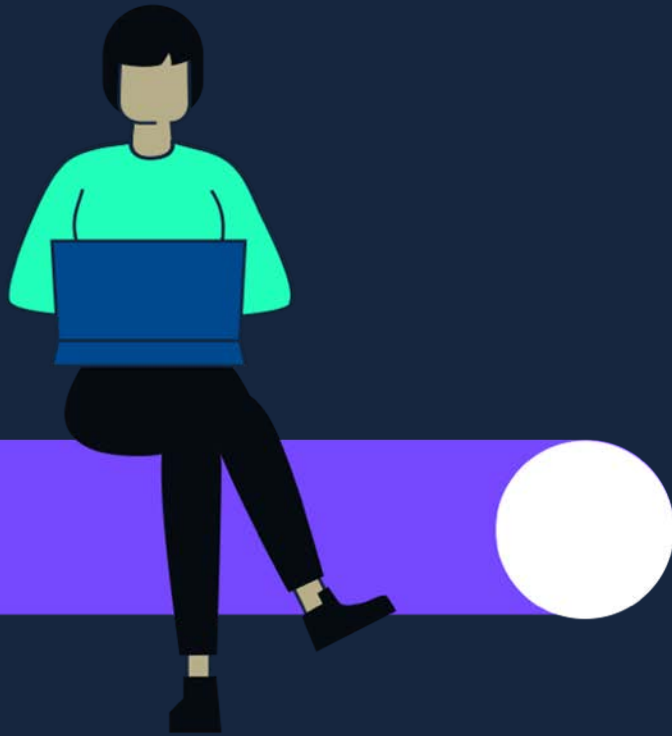

**The reach and high-  
performance of the  
underlying PCCW  
Global network**

**The peering  
opportunities of our  
leading IX partners**

# Making remote peering effortless

Once set-up with an Access Port, businesses can instantly use Console Connect to:

- Directly order IX services and pay for connections to LINX in real-time
- Experience high-performance remote peering with multiple exchanges through a user-friendly web portal
- Provision multiple virtual connections via a single Access Port
- Access higher bandwidth options

## An award-winning platform

Our Software Defined Interconnection® technology is gaining recognition worldwide...

### Juniper Research Awards:

- Network Virtualization Innovation of the Year – Platinum Winner (2021)

### AfricaCom Awards:

- Most Innovative Product or Service Award (2020)

### Telecom Review:

- Most Innovative Product or Service (Operator) (2020)
- Best Carrier Enterprise Service (2020)

### CAHK Awards:

- Best Enterprise Service (2020)

### Global Carrier Awards:

- Wholesale Innovation Disruptor 2020
- Best Network Technology Innovation 2019

# How do I get started?

It's free to join the Console Connect community.

Visit [www.consoleconnect.com](https://www.consoleconnect.com) to sign-up and get:

- Pricing for ports and connections.
- Discover, collaborate and connect with the community.
- Register your company for self-service, on-demand private connectivity.

# Get in touch

Thank you for your time. We would love to hear from you:
