

Capitalising on Crypto

Rebecca Lewis: Director of Partnerships, BSO

Crypto Trading and Infrastructure _

Crypto has the power to change the world of Financial Services - from tightly controlled & regulated to completely de-centralised (De-Fi): no govt or bank "owns" crypto currencies.

The Crypto industry offers massive liquidity as traditional global markets remain flat.

Industry is undergoing massive change: from retail to institutional - from unregulated "Wild West" to much more formal market structure

This is driving the change towards the connectivity and infrastructure needed.

Type of Crypto Traders and what they need connectivity to do for them

Institutional Investors - focused on security

Traditional Trading firms - want to get into Crypto trading to take advantage of liquidity available

Crypto Traders - new to low latency

Billions of individuals trading on their mobile devices

How is BSO enabling this huge shift in Financial Services

Providing mission-critical infrastructure without compromise, combining the highest standard of technology and the highest standard of service_

Crypto exchange and interconnection done right_

BSO provides secure, private and low latency connections to all of the leading digital asset exchanges on our high performance network.

Whether exchanges are located on-prem, in the cloud, or in a colocation facility, using a private, secure and low latency network that transports trading traffic between the digital asset exchanges ensures your trades are always enabled in the best possible way.

This allows crypto traders to leverage global arbitrage opportunities, connecting traditional capital markets with cryptocurrency exchanges.

Crypto Connect - how?

Low latency cloud connectivity

Using radio frequency metro connectivity and international fibre connectivity, combined to offer the lowest known latency in many countries, supporting market making, arbitrage and liquidity aggregation.

Unrivalled connections

Connected to major crypto exchanges and market data providers across multiple geographies including FTX, Binance, OSL, Eqonex, Bequant, Gemini and Kaiko.

Expert engineers

BSO's team of expert engineers orchestrates the most effective connectivity and cloud strategies for firms investing in crypto, delivering analytics capabilities through our integration and partnership with all major public cloud providers.
